

PERFORATIONS

On perforated panels, unless otherwise requested all standard products have a plain margin to all edges.. Opposite margins will be the same width, however it is not always possible to have side and end margins equal as it is a function of perforation pitching and the face dimensions of the tile.

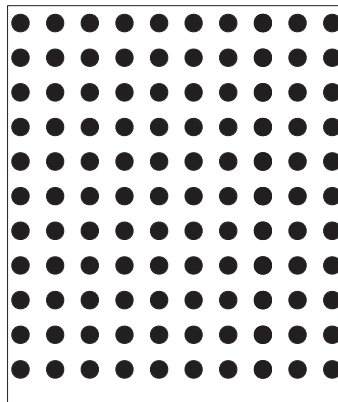

Shown here is the is the range of standard perforations. Non-standard perforations are also available on request.

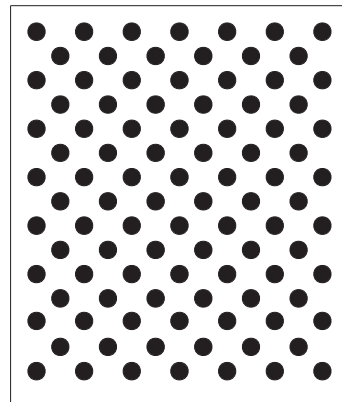

Round Hole Diamond Small
Diameter 2.4mm
Pitch 9.5mm
Perforated area 11%
Maximum width 600mm

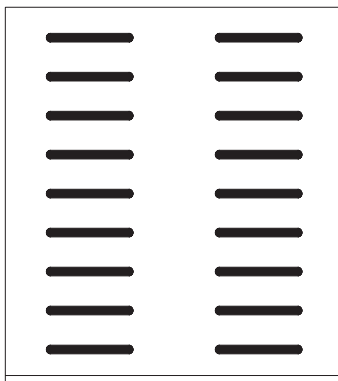

Slotted Small
12.7mm x 1.6mm
Pitch 19mm x 4.78mm
Perforated area 20%
Maximum width 300mm

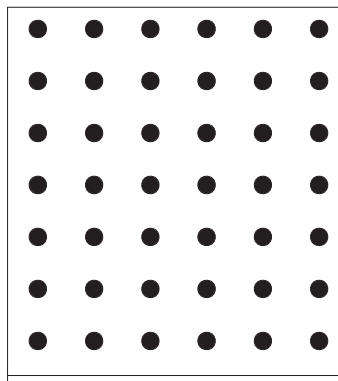

Round Hole Square Small
Diameter 2.4mm
Pitch 5mm
Perforated area 18%
Maximum width 800mm

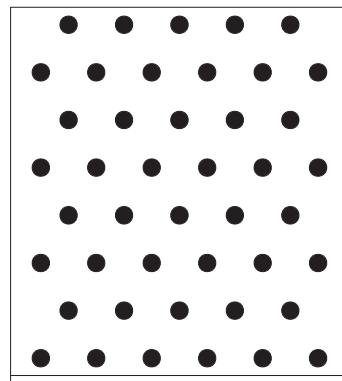

Round Hole Diamond Medium
Diameter 2.5mm
Pitch 7mm
Perforated area 20.1%
Maximum width 800mm

Slotted Large
12.7 mm x 1.9mm
Pitch 19mm x 5.7mm
Perforated area 19.5%
Maximum width 600mm

Round Hole Square Large
Diameter 3.1mm
Pitch 8mm
Perforated area 11.5%
Maximum width 600mm

Round Hole Diamond Large
Diameter 3.1 mm
Pitch 8mm
Perforated area 11.25%
Maximum width 600mm
